**The information in this document prepares the reader to understand  
the information that is taught in the Noonebu Academy.**

The existence of eternal nature is divided into time periods called cycles. These cycles of absolute nature are networks of natural laws and energies which cause all matter of nature to change for better or worse in a circular manner, completing phases of circular changes as time progresses. Completed phases are known as "Cycles of Nature." To put it another way: The Cycles of Nature are similar to the time numbers on the face of a clock, and the laws and energies of nature are the hands of the clock that turn and complete the cycles, and are thereby parts of the cycle network.

Figure 1 and 2 below this paragraph show circles divided into four equal quarters by perpendicular and horizontal lines. The same way that planet earth has four seasons and cycles, all existence (which is infinite-eternal nature) also has four major seasons and cycles. But, while the earth's seasons and cycles are measured in days, months, and years, absolute nature's seasons and cycles are measured in thousands, millions, and billions of years. The two circles below this paragraph are the same, and they show the sequence numbers (1-2-3-4) which are the order in which the four equal quarters exist, one degree at a time. This circle is called the "Existence Circle" or "Circle of Existence" because it represents all of nature (all existence) one degree at a time.

Figure 1 in the preceding paragraph shows the four major seasons of absolute nature. This circle has 720 degrees, symbolizing all existence (all of nature) and turning counterclockwise, existing one degree at a time.

*NOTE: You may be thinking, "What? A circle with 720°?" Most people believe that a circle is limited to 360 degrees because they do not account for the fact that the symmetry of a circle is infinite. Because the symmetry of a circle is infinite, there is no reason to limit a circle to only 360 degrees if the use for this symbol or shape requires it. A circle can be divided equally no matter how many degrees are designated.*

The spring season or first quarter of the Existence Circle is the "Revolution Cycle." The summer season or second quarter is the "Origination Cycle." The autumn (fall) season or third quarter is the "Declination Cycle." The winter season or fourth quarter is the "Evolution Cycle." Fig. 1 shows very clearly that the epoch period known as the Evolution Cycle is only one-quarter (1/4) of the Existence Circle, and knowing this is important because most people have never heard anything about the other three quarters of time and the activities thereof. There is a lot of evidence (artifacts) proving that civilizations existed and technology was being used millions of years ago. Most people are simply unaware of these facts

It is important to establish exactly where all people, places, and things are existing on the Circle of Existence right now and the specific mental and physical activities thereof. For instance, the Declination Cycle or third quarter of the Existence Circle is the mental, energetic, and physical processes of gradually undoing what happened during the Origination Cycle (rise of the second quarter), and revolution of the first quarter is the mental, energetic, and physical processes of slowly undoing what evolution did. The present time is the beginning of the Revolution Cycle. Note that point three (3) of the circles in Fig. 1 and 2 is at the absolute bottom of the circles and at the foot of the vertical line. Point 3 on the Circle of Existence is where every person, place, and thing exists right now at this time and all are going through revolutionary changes at this time. The immediate time to the left of the vertical line at the bottom of The Circle and represented by a dot (see Fig. 2) is called the "Moon Cycle" and lasts six thousand years. On the long term zodiac (bottom half of the circle in Fig. 4 later in this book), the Virgo Cycle of absolute nature is the last 3 million

(3,000,000) years of The Evolution Cycle, and The Moon Cycle is the last six thousand (6,000) years of The Virgo Cycle and Evolution Cycle.

The Libra Cycle of the long-term Zodiac of Nature is indeed the first three million (3,000,000) years of The Revolution Cycle, and THE SUN CYCLE (see Fig. 2), represented by a dot on the right side of the vertical line at bottom of The Circle, is the first six thousand (6,000) years of The Libra and Revolution Cycles. The sun and the earth's moon of our solar system are natural opposites in absolute nature in this part of our universe, because the sun represents life and the living and the moon represents death and the dead, mentally, energetically, and physically. As stated earlier, it is important to know where all people, places, and things are right now on the Circle of Existence and what time it is according to the timetable of universe annals. Where we all are right now is Point 3 on The Existence Circle, and it is definitely time for the change from the Moon Cycle (the cycle of forgiveness and also mercy) to the Sun Cycle (the cycle of balance, justice, and judgement). The close of the Moon Cycle and the rise of the Sun Cycle means that it is time for mental resurrection and mental liberation.

Fig. 3 is another form of the Circle of All Existence, and in more advanced Noonebu Academy books, which this booklet prepares the reader for, the Existence Circle is called the "S.M.T. Circle of Order." The other circles shown in this booklet are various forms of the S.M.T. Circle of Order. The nine (9) in the top half of this circle symbolizes the original and primary creative/destructive energies, which we call "NoopooH". The Six (6) in the bottom half symbolizes the evolutionary and secondary creative/destructive energies, which we call "ZoopooH". The bottom half of The Circle is the counter-world and opposite of the top half. The top half is a circle of 360° and the bottom half is likewise 360°, because the halves are different worlds, different time zones or periods, and different states of mind. The top half (9) is life and the living, and the bottom half (6) is death and the dead. The two halves exist at opposite times, and the circle exists one degree at a time. That one degree is all existence (all of nature) making a one degree circular change in all matter throughout nature.

The long-term zodiac, as shown in Fig. 4 at the bottom of the previous page, is not an imaginary line of longitude and latitude somewhere in the sky. Instead, it is the animal world which is bottom half of the existence circle. This world of animals is what we call the "Zoop" instead of the zodiac. The Zoop is the bottom half of the Circle of Existence, while the "Noop" is the top half as shown in Fig. 5. Both the Noop and Zoop are pronounced like they are spelled. Note that there are two dots in Fig. 2 at the bottom of the circle. The left dot denotes the Moon Cycle at the end of the Virgo Cycle, and the right dot denotes the Sun Cycle at the beginning of the Libra Cycle, which is where every person, place, and thing that in existence are right now at this time, and this is why it is time for mental resurrection and mental liberation. The laws, order, and principles of absolute nature dictate and determine that the Existence Circle must go back up toward better standards and qualities of life instead of everything descending further or starting to disintegrate at Point 3 on the Existence Circle.

NOTE: 9 and 6 are used to symbolize opposites and not values. Numbers denote value but a symbol in general can be used to denote anything. Though 9 and 6 are indeed numbers they are also symbols. There is a reason why these 2 symbols later became numbers. This topic is covered in Noonebu Academy lessons and literature.

Like the Noop, there are also twelve signs of the Zoop, and these long-term signs (cycles) last for 3,000,000 years each. One degree of the circle is a time duration of 100,000 years, and the Existence Circle of Order has 720 dots or degrees – 360 for life at the top half of the circle and 360 for death at the bottom half. The bottom half (Zoop) is the period of existence for animals and their world. The top half (Noop) is the period of existence for dynamos (second definition) and their world. Remember, the circle exists only one dot or degree at a time, and that one degree is all of absolute nature making a one degree circular change in all matter throughout nature. The direction of the Circle of Existence is counterclockwise degree by degree and eventually completes the whole Circle of All Existence back at the point where the circle begins which is at Point 3. The Noop is represented by parts of the human person instead of animals like the Zoop. The symbol 999 of the Noop, as shown in Fig. 4, stands for highest power and mentality in space, the highest power and mentality in matter, and the highest power and mentality in time. The symbol 666 of the Zoop stands for the opposite thereof.

While this booklet is intended to impart some vital knowledge to the reader and prepare him or her for more advanced knowledge, the main purpose of this booklet is to inform you of where we are right now on a universal timetable and what mental and energetic activities are and should be going on at this time. Where we all are on the Circle of All Existence is at Point 3 of the Space, Matter, and Time (S.M.T.) Circle. Now is the time for mental resurrection and mental liberation so that the Existence Circle can go back upward in the standards, qualities, and values of absolute nature on the right side of The Circle of All Existence. It is time for the rise of true culture, true philosophy, and the reintroduction of universal science called, the "Takanu" which is taught exclusively in the Noonebu Academy.

It is expected that the following question will arise, and it should: "How can we tell or how do we know that we are at Point 3 on The Circle of Existence?" All scientists, including anthropologists, archeologists, and geologists, know that nature (including people) have been in the evolution cycle for millions of years, and that evolution and the activities thereof act as a measuring meter on the progress of evolution, for better or worse. Taking this fact into consideration, we can identify when, where, and how evolution is taking place. Because of this fact, by default, we can also identify when evolution is not taking place or has stopped. Being that DNA is an excellent source of physical record and evidence, if there is life on this planet that is evolving, there must be some DNA evidence of it. If there is no DNA evidence of it, then one has no proof or evidence to support the claim that evolution is still occurring or continually taking place. If the majority of the life on this planet does not show evidence of evolution then one can observe that the life on this planet has stopped or is in the process of stopping. The life of this planet can indeed be used to measure and observe evolution. Likewise, it can also be used to measure revolution. Furthermore, the belief-based philosophies of this planet have been exhausted and are failing people. Mankind itself now has the capacity, ways, and means to make planet earth uninhabitable (non-livable) for all physical living beings and is destroying the Earth inside and out, as well as polluting and contaminating the atmosphere surrounding her. This cannot and will not continue indefinitely, if the Earth and the universe as well as their offspring are to survive. This is all evidence that supports the claim that the Evolutionary Cycle is over or ending.

These things indicate that we are at Point 3 on the Circle of Existence, and it's time for the mental resurrection and mental liberation of persons, places, and things.

The Noonebu Academy is qualified and authorized by the laws, order, and principles of absolute nature to record and circulate knowledge of absolute nature to those who want it and need it for survival, better living, and longer life.

Noonebu Culture provides mental cultivation in the form of nature education by universal reason for the purpose determining conduct, decorum, and behavior of persons and things as a way of life. Noonebu Philosophy provides a path for distinguishing knowledge from ignorance and rightness from wrongness, truth from lie, justice from iniquity, honesty from deception, reality from delusion, and reason from belief, amongst other things. In other words, Noonebu Culture is everyday conduct and activities of people based upon the laws, order, and principles of absolute nature and universal reason, as a way of life and death. Noonebu Culture is true culture.

Therefore, the pursuit of the nature of nature and its laws by way of universal reason via nature knowledge, clear understanding, and applied wisdom is the true culture of the Ta, and is what we call "Sun Culture"— the culture of the stars themselves. The Ta people were in power before falling (by nature) to the adverse forces of evolution. The negative forces of nature are the enemies of the Ta. The negative forces of nature that brought the world and its peoples to the brink of despair and destruction, morally and otherwise, are not of the nature to pull the Circle of Existence upward instead of downward. NoopooH and the Takanu must do that with nature knowledge and "Sun Mentality" or "Sun Mind"— the powers and science of harmonious survival and well-being.

Some people are taught to believe that each time a person is born, he or she has a new soul that never existed before. This is not true. What is true is that the baby that was just born has a new body that never existed before, and the new body must produce life for itself if it is to continue to live after birth. The umbilical cord of the mother provides life for the embryo and fetus during the gestation period before the infant is born. It is not an individual spirit being called a soul that keeps the body alive, because spirit beings survive on the food and blood of the living body themselves. In other words, it is just the opposite of what religionists teach. Instead of spirit beings being the lives of people, people are the lives of spirit beings, because life itself is indeed a burning. The burning can be conscious or unconscious, constructive or destructive. There exists the life of life and the life of death. The life of life exists in the top half of the Circle of Existence during the time that the top half exists. The life of death is in the bottom half of the same circle. Like life, death lives because otherwise it could not be active in order to reverse the living process.

Life springs from an acid base and is perpetuated (continued) by that acid base. Of course, acid burns, so hence, life is a burning, like the acid in a car battery is the life of the car. The car is made active by gas burning, and the person is made active by blood burning. "Brain Noots" that create brains from other matter are acid particles that produce mind and reason energy which carry out the creation work of brain noots, which are called the Prime-Mover (what scientists call the "god particle"). When a baby is born, the attending physician or mid-wife makes sure that the infant is breathing, and if it is not inhaling and exhaling, the baby gets a spanking to excite and activate the brain and nervous systems into action, because otherwise, the child will die unless it is stillborn (born dead) already. When the baby actively starts to breathe, the oxygen (air) it breathes goes to the lungs, and acid in the blood in its lungs burns the oxygen the child breathes, and that burning is natural electricity, which we call "9 Cosmos," which is life.

When the natural electricity reaches the brain, it lights up the brain like a bulb. Then, the person not only has life, but consciousness with that life, because he or she can then see, feel, taste, hear, and smell. Therefore, a person sees, feels, tastes, hears, and smells with his or her mental organ (the brain), the organ of consciousness, by way of the nervous systems of the brain.

The brain stays alive with the organ of oxygen (the lungs) and the organ of blood (the heart), which the brain grew for its survival. Marrow of the bones, the spinal cord, and the nervous systems of a person or thing are extensions, roots, and branches of the brain of a being. Of course, the nervous systems of a person are found throughout the physical person. Then too, there is nothing mysterious about the breath of life, for it is oxygen. The point is this: when the burning stops, that is the end of that individual's personal life, because the purpose of the body is to provide the conditions necessary for the burning (that is life), and when it fails to do that, life ends. In addition, the purpose of the body is to continue life and to be the tool that the brain uses for survival and support, pleasure and pain, etc.

Like the engine of a car gives off carbon monoxide (exhaust), the lungs of a person give off carbon dioxide. Carbon is residue of a burned substance or gas. The point is this: an individual inhaling oxygen and exhaling carbon dioxide is evidence of burning taking place in the lungs and throughout the circulatory system of a living person, and this is why the body of a living person is warm and that of a dead person is cold. Open your mouth and blow your breath on the back of your hand and feel how warm it is, and you will know that burning is taking place. Oxygen is being burned by blood and creating natural electricity, which is life. Life is indeed natural electricity, which is the life of all living persons and things in one degree or another.

Death is also a burning, but while life is a burning for construction and growth, death is a burning for destruction and decay. Death is a burning too, because death lives and this is why death is active and rules the bottom half of The Circle of All Existence. Life and death are certainly opposite processes. As already stated, life is a burning (natural electricity), and when that burning stops, that is the end of life, and death starts as a reverse burning, which may be called a cold burning, or the undoing of what life has done. At death or just before the death of a person or thing, the spirit being (or spirit beings) who possessed (were incarnate in) the person during his or her gestation period in his mother's womb or became incarnate at person's birth takes leave from the dying or dead person or thing and seeks refuge elsewhere, most likely becoming incarnate in another person, and this transmigration of what is called souls or spirits (which are conscious energies) from body to body is known as metempsychosis.

This is what actually happens at death, but there is no individual personal spirit or soul that goes on beyond the death of the body. The spirits who become incarnate in people existed already in time immemorial. The purpose of the body is to produce the burning (life), and when the burning ends, life ends, because the condition that keeps the burning going is among the organs of the body and not outside of the body.

Of all the various kinds of life that can exist, the most vital one next to physical life for a person is mental life, which includes spiritual life. Mental life is knowing who absolute nature is by laws and reason, through advanced scientific knowledge about absolute nature. Of all the various kinds of death that can exist, the most devastating one next to physical death of people is mental death, which includes spiritual death. Mental death is the opposite of mental life. Victims and sufferers of mental death are the mental dead. This booklet and other books distributed by the Noonebu Academy are designed to help mentally resurrect and liberate people from the adverse forces of mental death.

The "creator" did not just create some persons and things at the beginning of life and order and then stop creating, because he/she are still creating, and the way they created persons and things originally is the same way they still do, and that way is by growing them. Creating does not mean making something from nothing (which is impossible); creating means formulating and forming, constructing, building, manufacturing, composing, constituting, generating, concentrating, or growing persons, places, or things from matter or material that is already existing. THE CREATOR IS ALL SPACE, ALL MATTER, AND ALL TIME, and that is ALL NATURE. The space of nature is infinite vacuum. The matter of nature is anything and everything that occupies space. The time of nature is the continuation of the existence of infinite vacuum and infinite matter. Note that the true and nature-science definition of matter is "anything and everything that occupies space". When a person reasons out and rationally analyzes this definition of matter, he or she comes to know that matter is the "almighty," together with space and time. Matter cannot be created nor destroyed to the point that it no longer exists thus making it eternal — always existing forever.

Matter is the almighty and the creator is in the almighty. The creator is in all matter in one degree or another (in other words, in various degrees). The prime-mover in matter is called the "Brain Noot". The Prime-Mover is the first particles of matter to make the first move toward putting people, places, and things into creation order. In the Noonebu Academy we label these particles "brain noots". Brain Noots create, meaning, they grow brains, and as brain matter accumulates and consolidates, it produces energy called mind and reason. Reason uses mind and also other energies in matter, as well as itself, to grow persons and things. What causes the prime-mover (brain noots) to move toward formula, life and order are the proper conditions, laws of nature, and the cycle in season suitable for the being who is to come into life, form, and system as an entity. These requirements and principles of nature hold true whether the entity is going to be one of the largest organisms of nature or one of the smallest.

Brain Noots (the creator via reason energy) are in ALL MATTER throughout infinite-absolute nature. Brain Noots are microscopic and macroscopic, meaning, a person can neither see them with the naked eye nor with a microscope, but we can hear with them, smell with them, taste with them, feel with them (physically and emotionally), have thoughts with them, and see dreams and visions with them. The understanding of this topic explains why there are countless different living creatures and organisms on and in planet earth that no god in the sky would ever think about creating or indeed ever care about creating, and this means that the matter of absolute nature is all there ever was, all there is, and all there ever will be. This means that MATTER IS THE ALMIGHTY, forever, together with space and time. Matter, by ways of its brain noots and reason, is the creator, eternally.

Any intelligent person can reason out that there is no such thing that one day the bodies of all physically dead people are going to rise from their graves and other resting places and take on form and life again. To start with, that is against the laws of nature, which require physical living beings to go through the gestation, birth, and growth processes to have material being that is real and not an illusion.

Furthermore, even if a physical resurrection could and would happen, there would not be enough room on the earth to hold all human bodies that have existed, going back to the beginning of evolution and death 18 million years ago.

According to Noonebu Philosophy, like planet earth has four major seasons, the same is true for all existence in general (see Fig. 1). As all of nature exists one degree at a time on the Existence Circle, its circular changes in all matter turn counterclockwise (symbolically the turn of order) and opposite to the hands of a clock. When absolute nature arrives at Point 3 (see Fig. 1) from Point 6 on the left of the circle, it has finished the "Winter Cycle" of the universe. It then begins to enter the "Spring Cycle" of the universe of almighty nature. So, going beyond Point 3 counterclockwise calls for the 9 Cosmos Mentality Energy of the Universe Spring Cycle to wake up and start to emanate from the centers of the suns/stars (including our sun), like spring sap emanates from trees and plants after winter. This energy reaches the centers of the planets and satellites of the solar systems of the universe, and the planets and satellites begin to permeate energies that are more positive than before, and the mental resurrection of persons, places, and things has begun, together with the universe orbs.

Now that the universe orbs and bodies like the sun, earth, and moon are decreasing in 6 Cosmos energy and mind and increasing in 9 Cosmos Energy and mentality, someone has to herald and usher in this change from Universe Winter (The Evolution Cycle) to Universe Spring (The Revolution Cycle), and that someone is the ATENUBI TAHARAKHTI, the writer and messenger of NoopooH whose science is the Takanu, like the correct information in this presentation. NoopooH is the original creator and the original prime-mover of the universes and is also the resurrector of the mental dead. The mental dead are all peoples and persons that are ignorant about absolute nature and the laws, order, and principles thereof of as verified by universal reason and 9 Cosmos Science called the Takanu.

Whereas the four seasons called spring, summer, autumn, and winter of planet earth may deal mainly with weather, temperature, and vegetation changes, the four seasons of ALL EXISTENCE (All of Nature) also deal with changes in mentality, morals, standards, abilities, qualities, and values of Almighty Nature in "seasonal" ways as they pertain to persons, places, and things. The resurrection that we speak of is mental, not physical. Dead bodies will obviously not rise from physical graves. The resurrection is the mental awakening of people who will rise from the graves of ignorance and deception about absolute nature and its laws, and learn what we human beings must know and do in order to live in physical safety and economic security with peace and contentment. Reader, try to be one of those who learns Noonebu Philosophy, advocates it, and practices it, for this means that you are indeed rising from the grave of mental death, despair, and deception toward a longer and better life, and will survive the balance between right and wrong, knowledge and ignorance, truth and lies, honesty and deception, justice and iniquity, lawfulness and lawlessness, balance and imbalance, positive culture and negative culture.

What is taught at the Noonebu Academy is not just beautiful words and fictitious rhetoric, and Noonebu Philosophy is not just more delusion and deception that people like to be victimized by. It is reality and reason. Therefore, it is more difficult for people to be attracted to such positive nature science, which is correct information, knowledge, and truth. Moreover, fear of the unknown, evil spells, and curses of the negative forces of nature, and fear of the new and untried, repel people of negative nature and cause them to be suspicious and superstitious of the knowledge in this booklet and in other books distributed by the Noonebu Academy as well as the Noonebu community. It can be said then, that some people are susceptible to Noonebu Philosophy and others are not. However, this booklet is designed and dedicated to be a springboard to more advanced and greater knowledge of absolute nature via the Noonebu Academy. This booklet is the preparation presentation and qualifying device required to help you simplify and understand the literature, concepts, teachings, and instruction provided via the Noonebu Academy.

The teachings of the Noonebu Academy are designed, dedicated, and obligated by nature to bring individuals, groups of individuals, and nations of individuals up to date about reality, true culture, standards, and where we are on the Circle of Existence, and to inform people about what time it is to do what by nature. We are now at moonset and sunrise in the nature of nature, and it is time to rise from the mental dead and take our places in the lighthouse and powerhouse of the sun.
